DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on 06/20/06 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 6/20/06 was filed after the mailing date of the RCE application on 06/20/06. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Remarks

3. Claims 2 and 8 have been previously canceled; and claims 1, 3-7, and 9-21 are pending for reconsideration.

Allowable Subject Matter

4. Claims 1, 3-7, and 9-21 have been allowed.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

The prior art of record issued to Rehban fails to teach or suggest a broadcast receiver which detects the reception status of radio waves from other stations without deteriorating the reception status of a currently-receiving station, in digital broadcasting where consecutive time series data is transmitted. The amount of time-based interleave applied to the currently-receiving data is determined so that the reception status of the radio waves from other stations is detected while the reception of the currently-receiving broadcast station is interrupted within the extent where missing data can be recovered by such interleave and error correction processing on demodulation. Particularly, Rehban is silent on the step of comprising "a signal analyzing part extracts a control signal from a received signal and that the control signal indicates whether or not the received signal is interleaved along a time axis" as cited in claims 1 and 7; and for claim 13, Rehban also does not suggest varying a duration that the control circuitry interrupts a reception of a first broadcast signal based on the characteristics of the first broadcast signal. In addition, the submitted references have been checked and determined that they are not relevant to and/or reads on the claiming languages of claims 1, 7 and 13 as presented.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
